Application for Arborists Retained by Private Property Owner to Undertake Work on City Trees Schedule A

Is the Work related to construction and or a current permit application with Urban Forestry's Tree Protection and Plan Review Section? Yes No

Provide a detailed description of the Work in the chart below. Attach additional pages if required. Check the all the boxes related to the proposed work.

- If this application is related to tree removal, tree injury or standard pruning**, provide a detailed description of the proposed work for each tree.
- If this application is related to Integrated Pest Management**, specify the tree health concern and the proposed pest management method. Any proposed chemical treatment must comply with all current pesticide regulations.
- If this application is related to tree planting**, provide details regarding the proposed species; size and planting location(s). The proposed tree location(s) shall be identified by determining the distance in meters north, west, south or east from permanent reference points such as street curb, private walkway or building and the distance from the nearest tree, light post and/or hydrant. The proposed location must be acceptable to Urban Forestry. Suitable tree species are listed in Street Tree brochure available on Urban Forestry web site. Trees must be a minimum of 50 mm (2 inch) caliper and conform to Canadian Nursery Standards. The final location and tree species will be at the discretion of Urban Forestry staff.

Trees must be planted to the satisfaction of Urban Forestry.
